## GCSE

## MATHEMATICS

UNIT 2: CALCULATOR-ALLOWED FOUNDATION TIER

## $2^{\text {nd }}$ SPECIMEN PAPER SUMMER 2017

## 1 HOUR 30 MINUTES

## ADDITIONAL MATERIALS

A calculator will be required for this paper.
A ruler, protractor and a pair of compasses may be required.

## INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer all the questions in the spaces provided in this booklet.

Take $\pi$ as 3.14 or use the $\pi$ button on your calculator.

## INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.
Scale drawing solutions will not be acceptable where you are asked to calculate.

| For Examiner's use only |  |  |
| :---: | :---: | :---: |
| Question | Maximum <br> Mark | Mark <br> Awarded |
| 1. | 4 |  |
| 2. | 3 |  |
| 3. | 2 |  |
| 4. | 3 |  |
| 5. | 8 |  |
| 6. | 2 |  |
| 7. | 2 |  |
| 8. | 4 |  |
| 9. | 4 |  |
| 10. | 6 |  |
| 11. | 3 |  |
| 12. | 2 |  |
| 13. | 4 |  |
| 14. | 5 |  |
| 15. | 6 |  |
| 16. | 3 |  |
| 17. | 4 |  |
| TOTAL | 65 |  |

The number of marks is given in brackets at the end of each question or partquestion.

The assessment will take into account the quality of your linguistic and mathematical organisation and communication in question 5(c).

The assessment will take into account the accuracy of your writing (linguistic and mathematical) in question 14.

## Formula list

Area of a trapezium $=\frac{1}{2}(a+b) h$

1. Aneurin and Branwen arranged a party after winning their event at the Urdd. Complete the four entries in the following table to show part of their bill for the food they bought.

| Amount | Item | Cost |
| :---: | :---: | :---: |
| 4 bags | Nuts @ £1.35 a bag | £5.40 |
| 7 | Pizzas @ £1.75 per pizza |  |
| 3 | Chocolate cakes @ £ ......... per cake | $£ 7.47$ |
| ............ cartons | Orange juice @ 99p per carton | £8.91 |
| Total |  |  |

$\qquad$
$\qquad$
2. Use a ruler and a pair of compasses to make an accurate drawing of this triangle.

The line $A B$ has been drawn for you.
3.

Estimate the area of the shape drawn above on a square grid if the area of each square is $1 \mathrm{~cm}^{2}$.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
4. (a) Circle the correct word to describe the chance of each of the following events happening.
(i) Mai has a box containing 100 different cards.

Each card has one number written on it from 1 to 100.
Mai chooses a card at random from the box.
The chance that the number on the chosen card is a 2-digit number is
impossible unlikely even chance likely certain
(ii) Dafydd chooses a card at random from a box containing 50 cards. There are 16 yellow cards in the box.
The chance that the chosen card is yellow is
impossible unlikely even chance likely certain
(b) Write down the mode of these numbers.
$\begin{array}{llllllllll}4 & 5 & 4 & 7 & 8 & 4 & 5 & 9 & 3 & {[1]}\end{array}$
5. (a) Glyn has made a tower of bricks as shown below.

## Each brick has a number on it.

For each pair of bricks that are next to each other in the same row, the number on the brick above them is the total of the numbers on the two bricks.

Glyn has already shown some of the numbers.
Fill in all the other numbers on the bricks.

(b) Hari caught a bus into town.

His bus fare was $£ 2.85$.
He had only $£ 1$ coins with him.
The bus company's rules state that no change can be given.
In order to avoid losing any money, what coins should Hari make sure he has with him the next time he catches this bus?
Give the shortest possible list of coins.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(c) You will be assessed on the quality of your organisation and communication in this part of the question.

In a factory which makes 'ready meals', 2205 kg of potatoes are used every day.
There are 9 different types of these meals that are made and each of these uses the same weight of potatoes.

What weight of potatoes is used to make 4 of the types of meals that are made each day?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
6. Solve the following equations.
(a) $17+x=35$
$\qquad$
$\qquad$
(b) $8 x=480$
$\qquad$
$\qquad$
7. On the diagram, mark the point $T$ with a cross so that

- $\quad T A ̂ B=64^{\circ}$
- $\quad A T=7 \mathrm{~cm}$.

8. (a) Circle either TRUE or FALSE for each statement given below.

| STATEMENT |  |  |
| :--- | :---: | :--- |
| A cuboid has 6 vertices. | TRUE | FALSE |
| A tetrahedron is a pyramid with 4 triangular faces only. | TRUE | FALSE |
| A cube has 12 equal edges. | TRUE | FALSE |
| A triangular prism has 3 rectangular faces. | TRUE | FALSE |

(b) In the space below, draw one shape which has both

- rotational symmetry of order 3, and
- 3 lines of symmetry.

You must draw in the lines of symmetry.
9. Here are two sequences of numbers.

Some of the numbers have been left out of each sequence.
Fill in numbers to make correct sequences.
After each sequence, write down the rule used to find the next term in your sequence.
(a) 5 ,
14,
$\qquad$
$\qquad$
$\qquad$
Rule
$\qquad$
(b) 40 ,

5,
$\qquad$
$\qquad$
$\qquad$
Rule
10. (a) Simplify the expression $9 g-5 f-2 g+3 f$.
(b) Find the value of $3 x+4 y$ when $x=-2$ and $y=4$.
(c) Write down the next two numbers in the following sequence.

| 20 | 14 | 9 | 5 | 2 |
| :--- | :--- | :--- | :--- | :--- |

11. (a) Circle the correct answer for each of the following statements.
(i) Helen has bought one of the eighty tickets sold in a raffle. The probability that Helen wins the top prize in the raffle is
$\frac{1}{79}$
1\%
1:80
$\frac{1}{80}$
80\%
[1]
(i) One ball is selected at random form a box containing 5 blue balls, 4 red balls and 1 yellow ball. The probability that the selected ball is blue is
$\frac{5}{5}$
$\frac{1}{2}$
$\frac{5}{41}$
$\frac{10}{5}$
5\%
(b) A bag contains some red, green and black beads.

One bead is selected at random from the bag.
The probability of selecting a green bead from the bag is $\frac{1}{3}$.
Which of the following sets of beads could have been in the bag?
Circle the correct answer.

| 2 red | 3 red | 3 red | 7 red | 5 red |
| :---: | :---: | :---: | :---: | :---: |
| 1 green | 6 green | 3 green | 4 green | 3 green |
| 1 black | 3 black | 4 black | 1 black | 4 black |

12. Calculate $38 \%$ of $15 \cdot 6$.
$\qquad$
$\qquad$
$\qquad$
13. The two shaded rectangles shown below are to be drawn on a white, square card of side length 9 cm .
The two rectangles should not overlap.

Diagrams not drawn to scale
Show clearly how this can be done, and calculate the area of the square card that will be unshaded.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
14. You will be assessed on the quality of your accuracy in writing in this question. The frequency table shows the number of points gained by a football team in each of its matches in the Welsh Premier League.

| Points scored | Number of matches |
| :---: | :---: |
| 0 | 6 |
| 1 | 5 |
| 3 | 11 |

Calculate the mean number of points gained per match by this team. Give your answer correct to 2 decimal places.
[4 + W 1]
$\qquad$
$\qquad$
